

Damper actuator for adjusting air control dampers in ventilation and air-conditioning systems for building services installations

- For air dampers up to approx. 1.5 m²
- Torque 8 Nm
- Nominal voltage AC/DC 24 V
- Control: Open-close (not made for 3-point applications)
 • Running time 4 s

Technical data					
Electrical data	Nominal voltage			AC 24 V, 50/60 Hz / DC 24 V	
	Nominal voltage range Power consumption In operation			AC 19.2 28.8 V / DC 21.6 28.8 V	
	·	At rest		13 W @ nominal torque 2 W	
		For wire sizing		23 VA (I max. 20 A @ 5 ms)	
	Connection			Cable 1 m, 3 x 0.75 mm ²	
Functional data	Torque (nominal torque)			Min. 8 Nm @ nominal voltage	
	Direction of rotation			Reversible with switch 0 🖍 resp. 1	
	Manual override			Gearing latch disengaged with pushbutton, can be locked	
	Angle of rotation			Max. 95°	
	Angle of rotation limiting			min. 30°	
	Running time			4 s / 90°⊲	
	Automatic adjustment of operating range to			Manual triggering of the adaption by pressing the	
	match the mechanical angle of rotation			«Adaption» button	
	Sound power level			52 dB (A)	
	Position indication			Mechanical, pluggable	
	Negative torque	2	Λ	≤50% from nominal torque (Caution: can only be used with restrictions. Please contact your Belimo representative.)	
Safety	Protection class			III Safety extra-low voltage UL Class 2 Supply	
	Degree of protection EMC			IP54 in any mounting position NEMA 2, UL Enclosure Type 2	
				CE according to 2004/108/EC	
	Certification			Certified to IEC/EN 60730-1 and IEC/EN 60730-2-14 cULus according to UL 60730-1A and UL 60730-2-14 and CAN/CSA E60730-1:02	
	Mode of operation			Type 1	
	Rated impulse voltag	е		0.8 kV	
	Control pollution degr			3	
	Ambient temperature	1		−30 +40 °C (no restrictions)	
		2	Λ	+40 +50°C (Caution: can only be used with restrictions. Please contact your Belimo representative.)	
	Non-operating tempe	erature		−40 +80°C	
	Ambient humidity			95% r.H., non-condensating	
	Maintenance			Maintenance-free	
Dimensions / Weight	Dimensions			See «Dimensions» on page 3	
	Weight			Approx. 970 g	

Safety notes

- The actuator is not allowed to be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.
- It may only be installed by suitably trained personnel. Any legal regulations or regulations issued by authorities must be observed during assembly.
- The device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- · The cable must not be removed from the device.
- Adaptation is necessary when the system is commissioned and after each adjustment of the angle (press the adaptation push-button)
- When calculating the required torque, the specifications supplied by the damper manufacturers (cross section, design, installation site), and the air flow conditions must be observed.
- The device contains electrical and electronic components and is not allowed to be disposed
 of as household refuse. All locally valid regulations and requirements must be observed.

Product features

Simple direct mounting

Simple direct mounting on the damper spindle with a universal spindle clamp, supplied with an anti-rotation strap to prevent the actuator from rotating.

Manual override

Manual override with push-button possible (the gear is disengaged for as long as the button is pressed or remains locked).

Adjustable angle of rotation

Adjustable angle of rotation with mechanical end stops.

High functional reliability

The actuator is overload-proof, requires no limit switches and automatically stops when the end stop is reached.

Home position

The first time the supply voltage is switched on, i.e. during initial startup, the actuator carries out an adaptation. After pressing the "gear disengagement" pushbutton, the actuator moves to the home position at the end stop.

Pos. Direction of rotation		Home position			
0	0	ccw 🚩	Left stop		
((1	Cw	Right stop		

The actuator then moves into the position defined by the control signal.

Adaption and synchronisation

During adaptation, the upper and lower spindle end stop is recorded and deposited in the actuator. Detection of the mechanical end stops enables a gentle approach to the end positions and thus protects the actuator mechanism.

During synchronisation, the actuator moves to the home position for angle referencing. This ensures correct position regulation.

Accessories

7000001100		
	Description	Data sheet
Electrical accessories	Auxiliary switch SA	T2 - SA
	Feedback potentiometer P.A	T2 - PA
	Adapter Z-SPA Ordering of this adapter is compulsory if an auxiliary switch or a feedback potentiometer is required and the clamp is simultaneously mounted on the rear of the actuator (e.g. with short-spindle mounting).	
Mechanical accessories	Various accessories (clamps, shaft extensions etc.)	T2 - Z-SMA

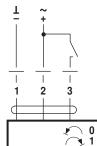

Electrical installation

Wiring diagram

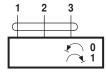

Note

- · Connect via safety isolation transformer.
- Parallel connection of other actuators possible. Note performance data for supply.

Direction of rotation

Cable colours:

1 = black

2 = red

3 = white

Operating controls and indicators

1 Direction of rotation switch

Switching over: Direction of rotation changes

(2) Push-button and green LED display

No voltage supply or fault Off:

On: In operation

Press button: Switches on angle of rotation adaptation followed by standard operation

(3) Push-button and yellow LED display

Standard operation Off:

Adaptation or synchronising process active On:

Press button: No function

(4) Gear disengagement switch

Press button: Gear disengaged, motor stops, manual override possible

Release button: Gear engaged, synchronisation starts, followed by standard operation

Check voltage supply connection

(2) Off and (3) On

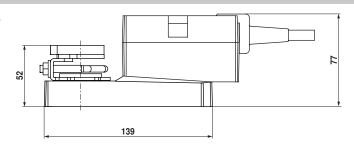

Check the supply connections.

(2) Blinking and (3) Blinking

Possibly ± and ∓ are swapped over.
